

LEVE(N)DE

WOLUWE

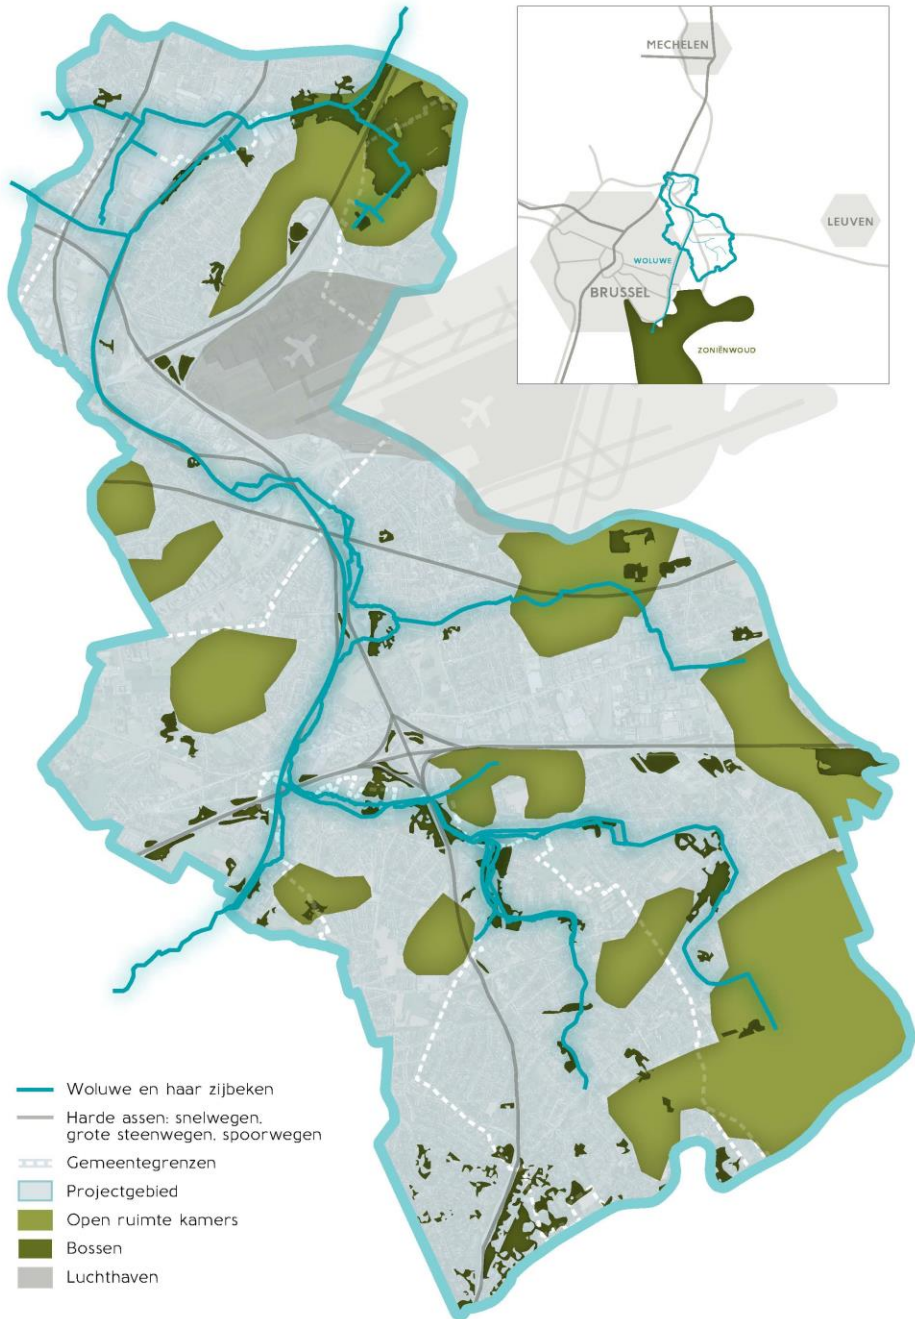

**Space for water, nature
and connection**

Strategic Project Leve(n)de Woluwe

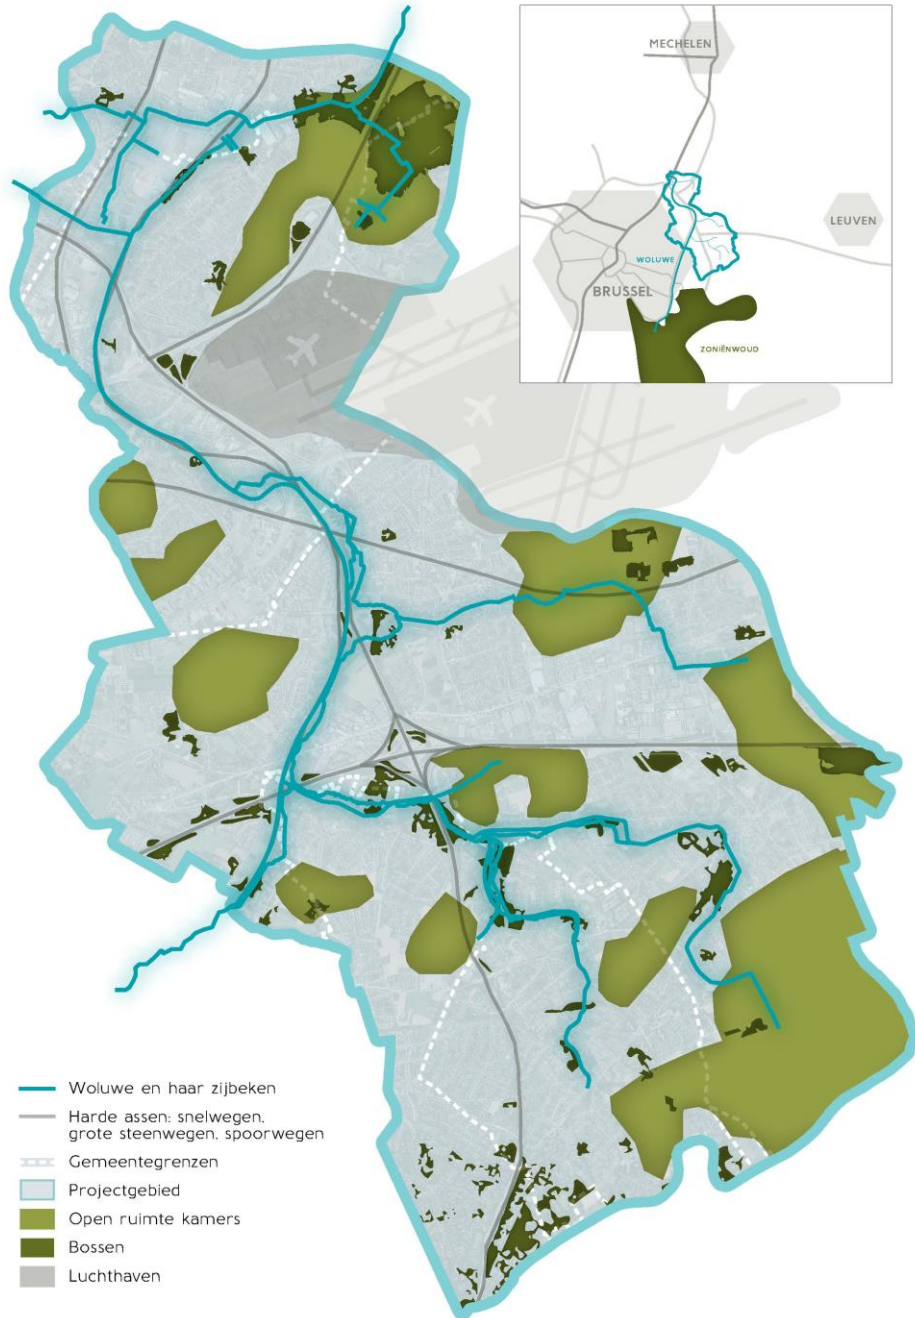

Natural landscapes...

- Recognizable valley structures
- Agricultural landscapes
- Hollow lanes
- Municipal parks, castle domains,...

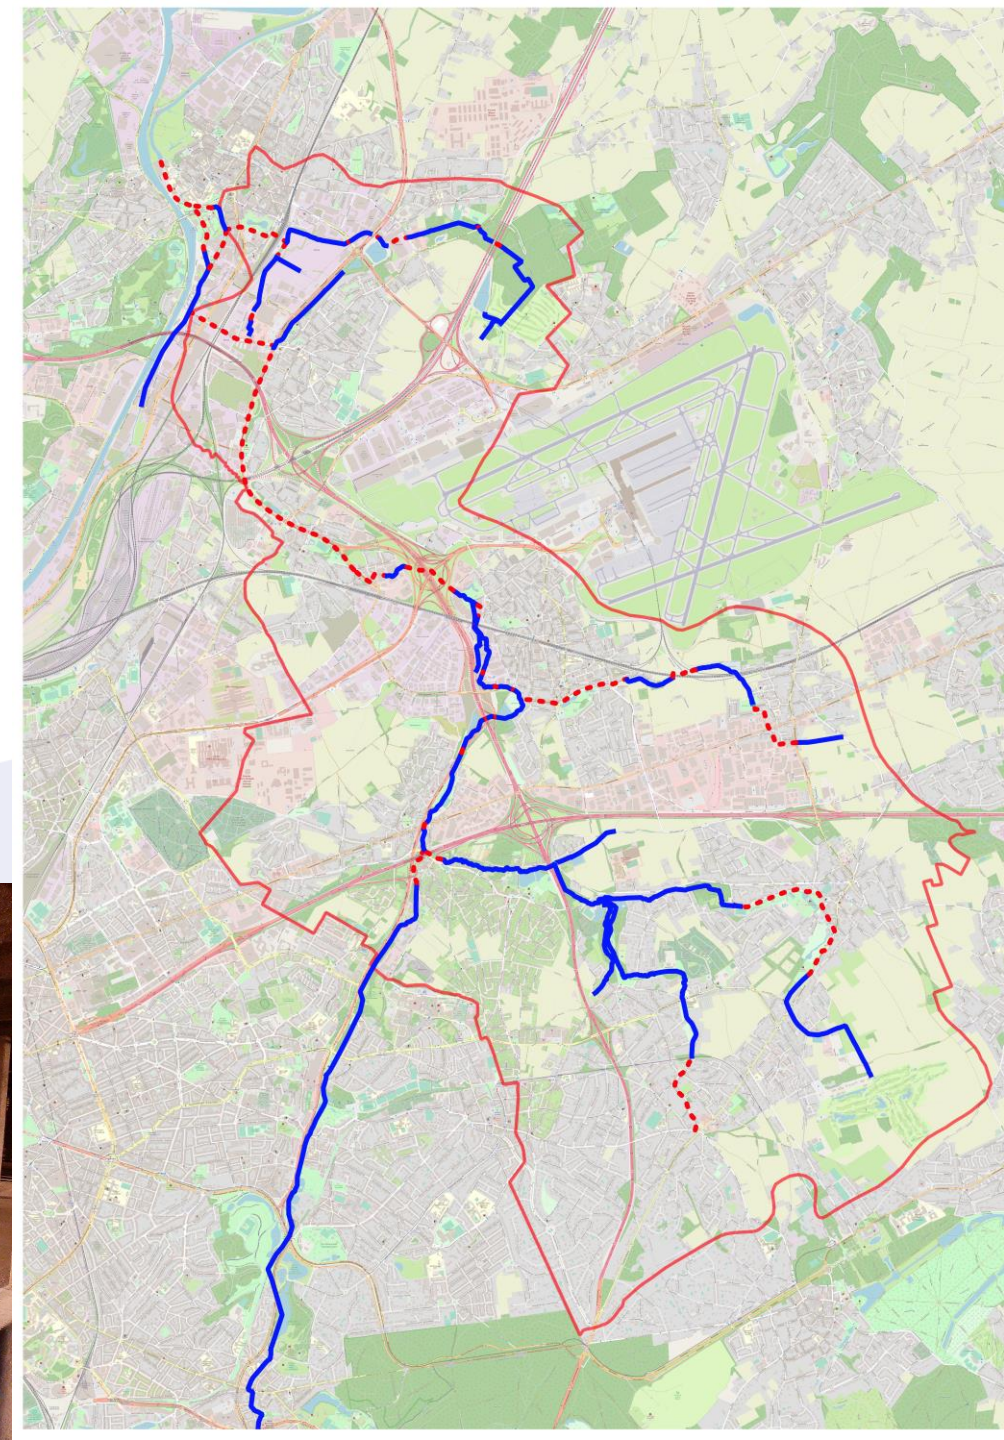

... contrasting with

- High degree of urbanization
- Highly dynamical area (airport, highways, railroads, industrial areas, villages,...)
- Fragmentated nature and open spaces
- Hidden watercourses

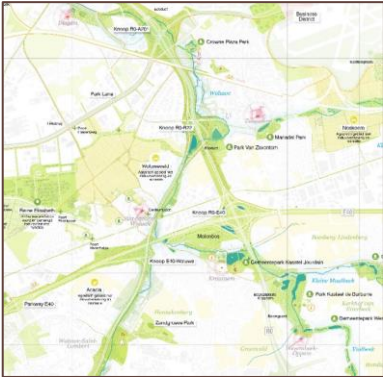

Water related problems of the Woluwe valley

- Highly paved region
- Loss of natural connection between water and landscape
- Floodings

A flying start for more cooperation

- Major Flemish investments in the blue-green network
- Major supra-local infrastructure projects
- Existing programs and vision documents around improving open space and waterways (from interregional to local)
- Ambitious local municipalities

Integraal Waterbeleid
Samen werken aan water

DE WERKVENNOOTSCHAP

VLAAMSE MILIEUMAATSCHAPPIJ

VLAAMSE LAND MAATSCHAPPIJ

Strategic goals

Goal 1

Strengthening the blue-green networks

Goal 2

Win-Win: more efficient use of available resources

Goal 3

Connecting people with the Woluwe

One integrated strategic plan

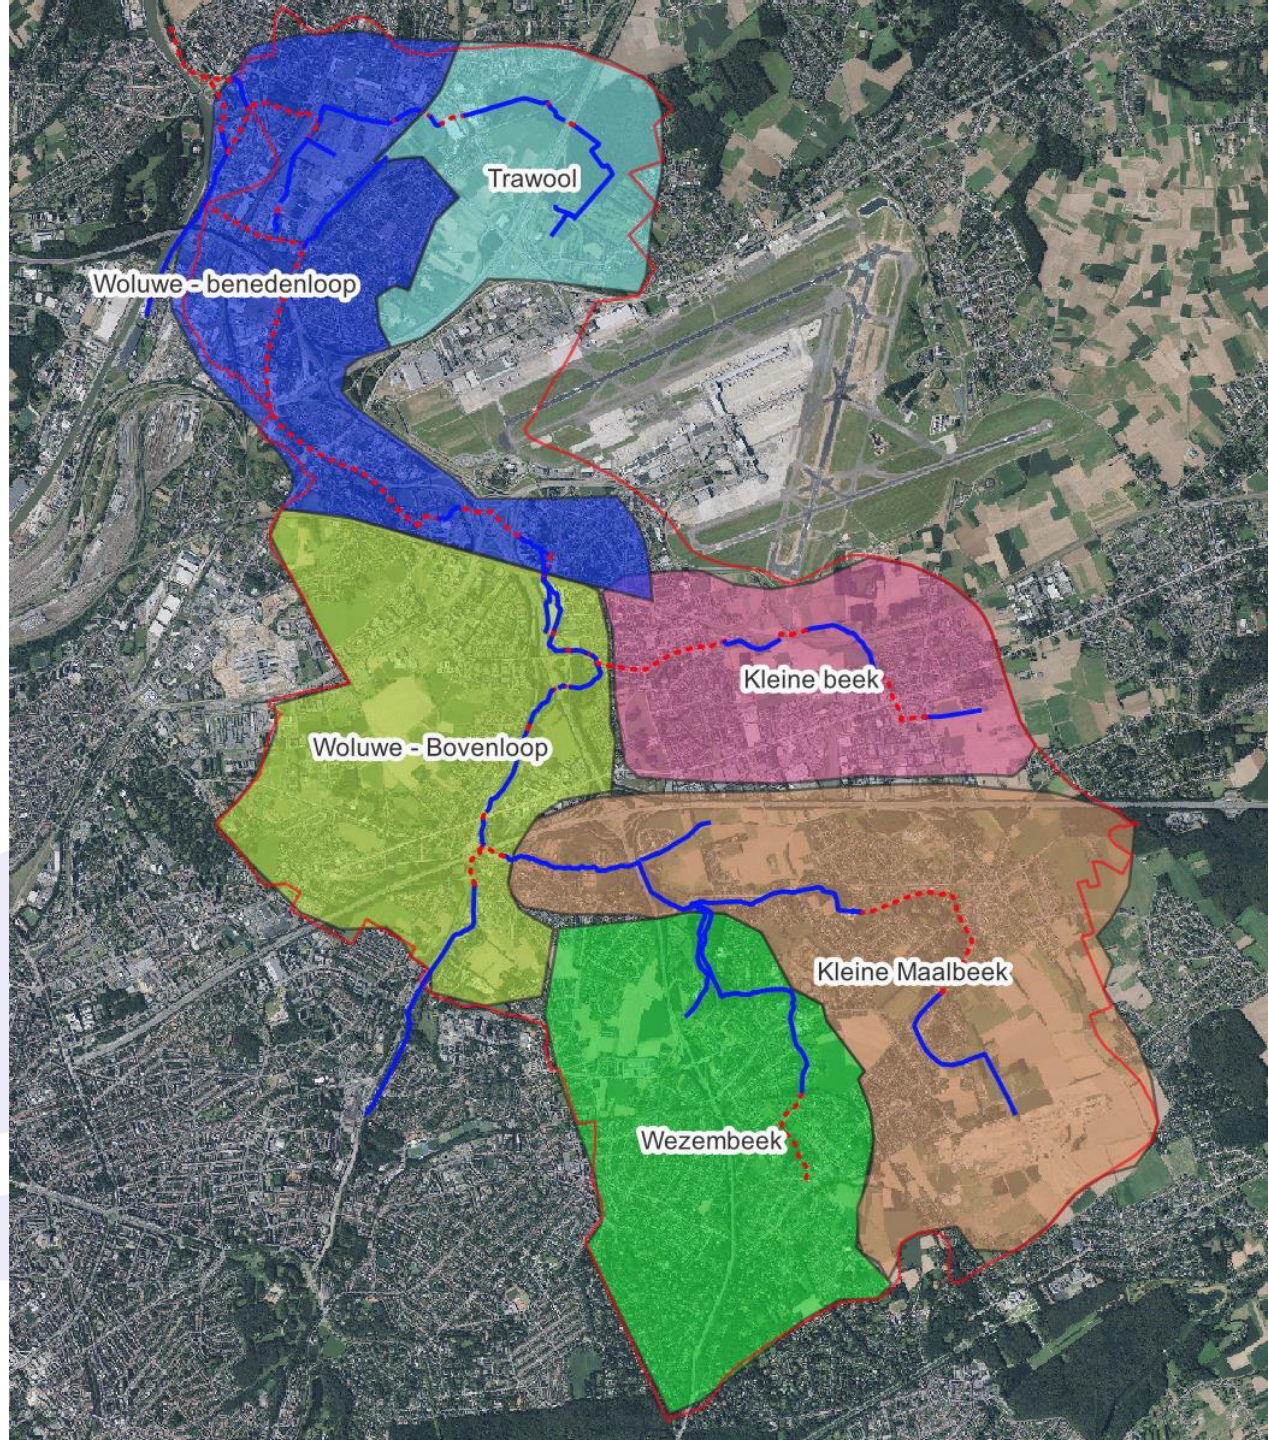

LEVE(N)DE
WOLUWE

Action plans

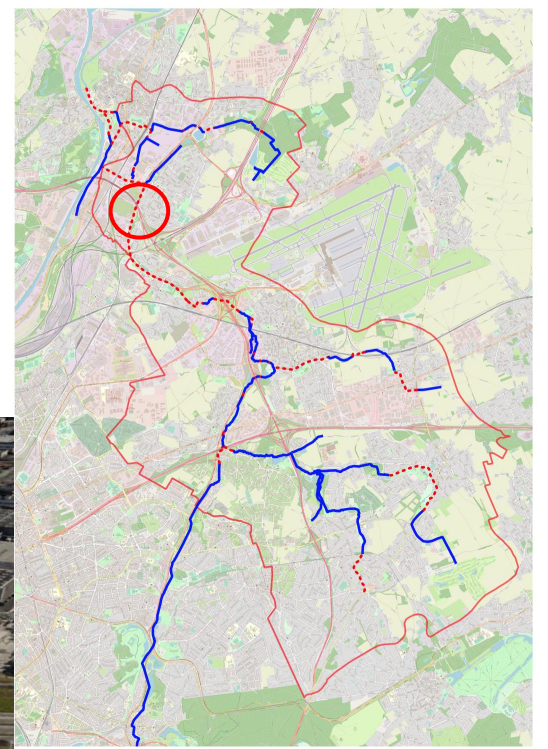

- Different challenges
 - Spatial
 - Administrative
- Customised objectives

Release the river

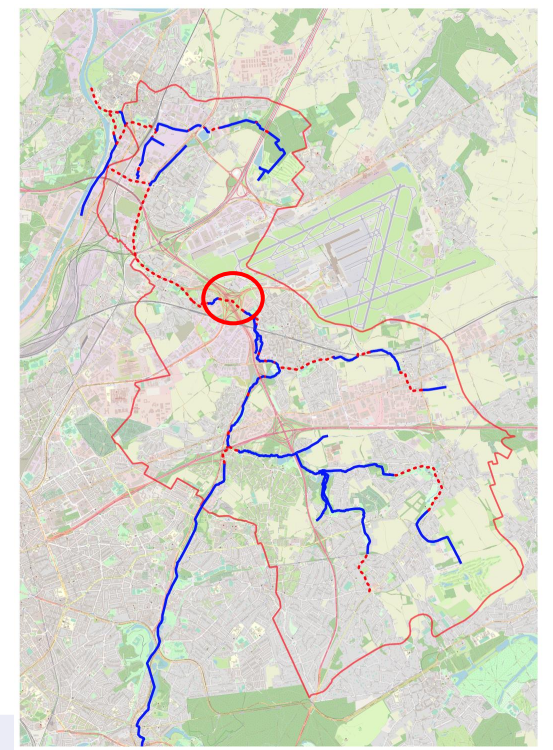

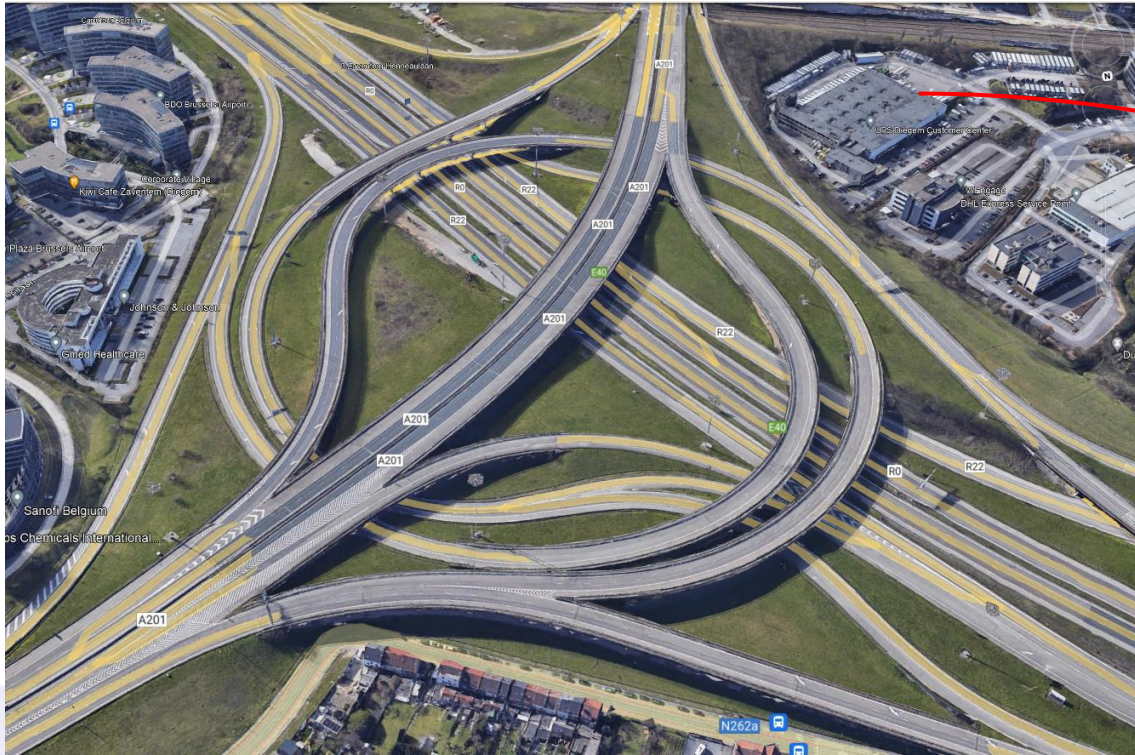

WOLUWE

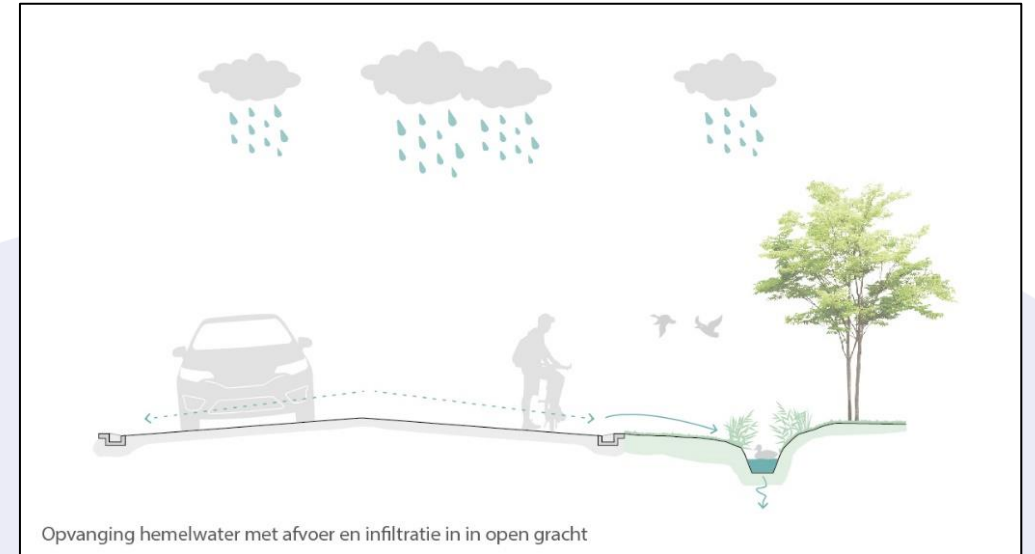

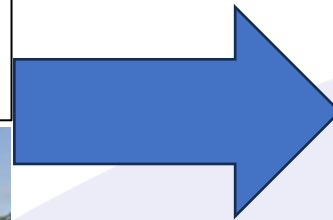

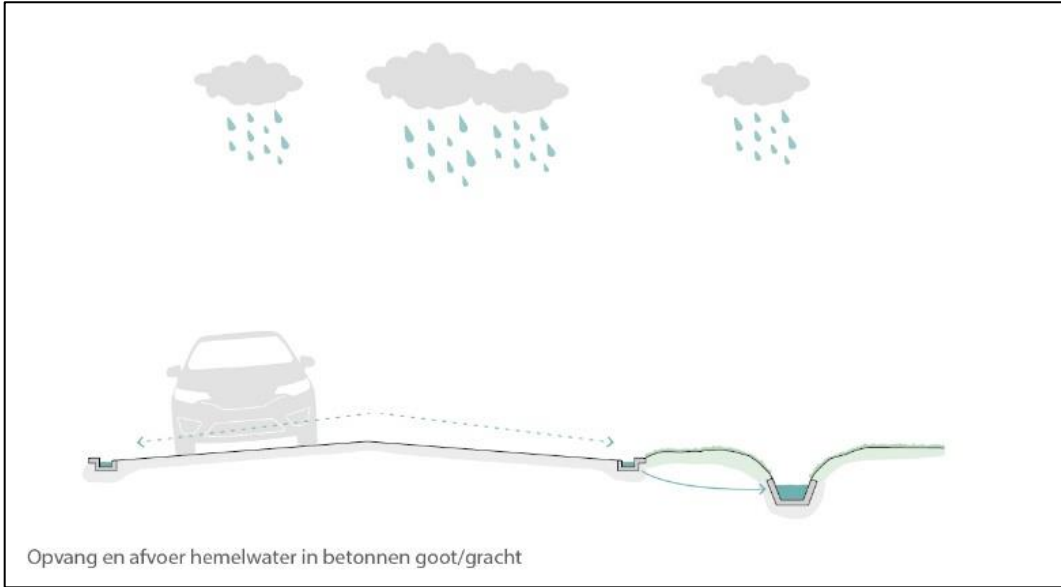

Release the river

Release the canals

Release the springs

- Finding the lost springs of the Woluwe river
- Restoring spring locations to their former glory
- Connecting spring water back to the landscape
